(a.k.a. Dex fUX)

We're all very aware of my tendency for using, um, colorful analogies and my lack of shyness in littering the landscape around me with f-bombs. In the spirit of that, I offer you the first in what should be (at the very least) an interesting set of presentations showcasing my opinions on what's wrong with how most people address (or don't address) user experience.

Fixing the User Experience
